# Your Imagination Is The Only Limit!

Rapid Rack Industries has manufactured material handling storage products for over 50 years. We introduced boltless shelving systems over 35 years ago and revolutionized the shelving industry. Rapid Rack Boltless Shelving is an economical, flexible and strong storage system that is incredibly versatile with an infinite variety of uses. Our products are found in a variety of applications covering clients in the Industrial, Commercial, Retail, Automotive, Aerospace, Government and Health Care related industries.

We offer factory-direct space planning and design assistance, product specification assistance, CAD drawings, as well as project management and installation services. Our management, engineering and sales team bring countless years of experience, in multi-discipline industries, providing material handling storage solutions that meet both our client's needs and budgets. Our service is second to none.

# IN STOCK SOLUTIONS

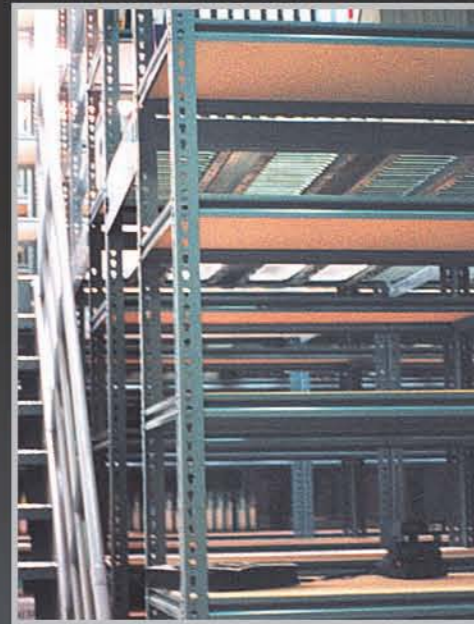

## Space Saver Shelving

- Single rivet beam for maximum clear space between shelves
- Shelf sizes up to 48" wide by 36" deep
- Vertical adjustability on 1 1/2" centers
- No added bracing allows accessibility from all sides
- Assembles in minutes for immediate use
- Tee posts available for add-on sections in longer rows

## "Z" Beam Bulk Rack Shelving

- Unique beam design for high capacity and added clear space
- Wide spans up to 72" wide and 48" deep
- Beam design protects all shelf edges
- Vertical adjustability on 1 1/2" centers
- Heavy-duty posts allow for multi-level catwalk systems
- Standard heights up to 15' available

## Bulk Storage Shelving

- Double rivet beam for heavier load capacity, up to 2,000 lbs.
- Wide spans up to 96" wide and 48" deep
- Vertical adjustability on 1 1/2" centers
- Standard heights up to 15' available
- Heavy-duty posts allow for multi-level catwalk systems

**RAPID RACK®**

# ENGINEERED SOLUTIONS

## Record Archive Storage

- Specific size beams to accommodate archive boxes
- Designed to completely utilize shelf openings
- Double rivet beam for wide span capability
- Standard shelf size of 69" wide by 30" deep
- Double entry sections for higher density with easy accessibility
- Heavy-duty posts allow for multi-level catwalk systems

## Multi-level Catwalk Systems

- Heavy-duty, 14 gauge one piece posts
- Rigid connection for solid deck support
- Designed and engineered for all seismic zones
- Maximum use of building heights
- Can use various shelf designs

**RAPID RACK®**

# SPECIALIZED SOLUTIONS

## Battery Storage Racks

- Gravity flow roller design in varying depths
- Automatic first-in / first-out inventory control
- Easily adjusted for various battery sizes
- Quick and easy assembly

## Tire Storage Racks

- Double rivet tire support beams for high capacity
- Single and double entry available
- Up to 6 adjustable levels of tire storage
- Systems for specialty tires available
- Heavy-duty posts allow for multi-level catwalk systems

## Mobile Aisle Systems

- Maximize storage space
- Reliable, low maintenance track system
- Uses standard Rapid Rack components
- Expandable
- Sections glide with minimal effort
